

# idINA

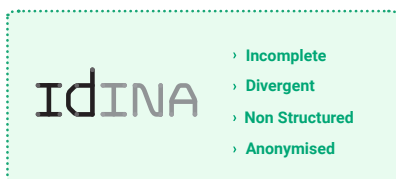

Inclusive  
Non-Authoritative  
Digital Identity

IDINA aims to create a platform to ensure the identity of all citizens in an effective and inclusive way in countries with insufficient or no civil registration infrastructure, helping to build a fairer and more equal society.

## Citizens

## Sources

## HOW WILL IDINA HELP?

Citizens use the non-authoritative identity produced by IDINA to exercise their citizenship.

Local credible entities use IDINA to certify identification data of individuals with whom they interact on a daily basis.

IDINA consolidates and estimates the quality of the information collected.

## TEAM

"IDINA materializes technological innovation as a mechanism for improving people's quality of life, even those with limited access to these technologies."

**João Marco, INESC TEC**

"Many are those who are born, grow up, live and die without ever having access to official registration. IDINA aims to fill this gap by setting a reliable source of identification achievable by everyone."

**Silvia Garcia, INCM Lab**
